

SECTION H – SPECIAL CONTRACT REQUIREMENTS

H.1 RESOURCE CONSERVATION/RECYCLING

The Contractor will track FAA's procurement and recycled content purchases and provide annual data for the EO 13101 annual report as part of the nationwide office supply contract.

Resource Conservation and Recovery Act Report (RCRA) and Executive Order(EO) 12873 Annual Report. Section 6002 of RCRA requires OFPP to report to Congress on the actions taken by agencies to implement this statute. EO 12873 reinforces affirmative procurement, waste minimization, and recycling efforts and requires Federal agencies to report on their efforts to the OFEE. To simplify the reporting process and reduce the reporting burden placed on agencies, the Office of the Federal Procurement Policy (OFPP) and the Office of the Federal Environmental Executive (OFEE) have merged the reporting requirements of section 6002 of RCRA, and EO 12873 into a single annual report. The report is divided into the Agency Summary Report and the Supply Center Summary Report. The report covers commercial purchases of items contained in the Comprehensive Procurement Guidelines, as well as affirmative procurement, waste minimization and recycling efforts. Due Annually; February 26 (see Form #92 in FAST Toolset)

See http://fast.faa.gov/docs/forms/resource_recoveryact.doc for detailed information.

H.2 SECTION 508 COMPLIANCE

FAA has determined that Sections 1194.21, 1194.22 and 1194.41 of Title 36, Code of Federal Regulations, relating to accessibility standards apply to this procurement under Section 508 of the Rehabilitation Act of 1973. The portal development must adhere to Sections 1194.21 and 1194.41. The telephone service must accommodate TTY functionality under Section 1194.21. See Section J, Attachment II, Section 508 Compliance.

Contractor conformance with these requirements is a material term of the contract.
